➤ SUMMARY

Computer Science undergraduate with hands-on experience in Python, Django, Flask, Machine Learning and SQL. Completed AI & Cloud and Machine Learning internships while building practical web and ML projects. Seeking a Software Developer/Python Developer role to contribute strong problem-solving and development skills.

➤ WORK EXPERIENCE

- ❖ **Virtual Internship Program - Machine Learning Engineer (Smart Bridge)**
 - Built and evaluated multiple ML models using Python and Scikit-learn, improving model accuracy through preprocessing and feature engineering.
 - Gained hands-on experience in Model Building, Data Preprocessing and Evaluation Techniques.
 - Demonstrated ability to apply, ML concept to real-world applications.
- ❖ **AI & Cloud Intern | IBM SkillsBuild & Edunet Foundation (AICTE)**
 - Developed and deployed AI/cloud-based solutions using IBM Cloud services and integrated cloud tools in project workflows.
 - Completed project-based learning modules on cloud services, AI applications, and integration.
 - Enhanced skills in cloud deployment, AI tools, and real-world implementation of emerging technologies.

➤ EDUCATION

2022 – 2026 Scored 7.15 CGPA	Bachelor of Technology (B-Tech) in Computer Science Dr. A.P.J. Abdul Kalam Technical University
2017- 2019 Scored 50 % with a focus on PCM	Senior secondary (XII) / Intermediate CBSE
2015- 2017 Scored 76 % with a focus on science	Secondary (X) / Matriculation CBSE

➤ PROJECT

- ❖ **Employee performance Prediction**
 - Description:** Developed an employee performance prediction system using classification algorithms, achieving approximately 88% prediction accuracy.
 - Implemented:** Data-Preprocessing, Feature selection and model Evaluation techniques.
 - Technologies:** Python, Flask, HTML, CSS, Pandas, Scikit-learn and Matplotlib.
 - Features:** Key-features include performance prediction, accuracy analysis and insights for HR decision-making.
- ❖ **AI Resume Analyser**
 - Built an AI-powered resume analyser using React.js and Puter.js, enabling serverless client-side calls to the Gemini API without a custom backend.
 - Generated automated ATS compatibility scores plus section-wise feedback and improvement suggestions for uploaded resumes.
 - Designed a clean, responsive results dashboard to visually present score breakdowns and actionable recommendations.

➤ SKILLS

- Programming Languages:** C, Python, JavaScript, SQL.
- Frontend:** HTML, CSS, Tailwind CSS, Bootstrap.
- Backend & Database:** Django, Flask, MySQL.
- Machine Learning:** Pandas, NumPy, Scikit-learn, Matplotlib, Data Preprocessing.
- Tools & Platform:** Vs Code, Git/GitHub, Figma, Jupyter Notebook.
- Concepts:** OOPs, Data Structures & Algorithms, DBMS Fundamentals
- Soft Skills:** Teamwork, Problem-Solving, Communication, Time Management.

➤ CERTIFICATION & ONLINE COURSE

- | | |
|--|----------------------------|
| • <i>Introduction of Internet of Things (NPTEL, Virtual)</i> | Feb-2025-April-2025 |
| • <i>ML with Python – EISystems, Technex'25 IIT (BHU) Varanasi</i> | Jul-2025-Sep 2025 |

➤ EXTRA CURRICULAR ACTIVITIES

- ◆ **President, Coding Club — Vishveshwarya Group of Institutions** **2023-2024**
 - Led club strategy, event coordination, and member management, increasing event participation by 40%.
 - Organized campus-wide hackathons and coding competitions fostering peer-to-peer collaborative programming.
 - Delivered technical workshops on Python fundamentals and modern web development to 50+ students.
